Afterbanks services

In relation to the services provided to you by Morpheus Aiolos, S.L. (Afterbanks), under this Agreement:

By using our Sage Bank Feeds Aggregator, Afterbanks, you authorise Afterbanks to have the right and the authority to act on your behalf to access and collect your account information from the relevant Banks.

The provision of the services is carried out in accordance with the provisions of '[Royal Decree 19/2018](#) of 23 November', the Spanish law which implemented the EU's [Payment Services Directive 2 \(PSD2\)](#), and Afterbanks is authorised by the Banco de España to provide account information and payment initiation services and undertakes to maintain such authorisation through the term of this Agreement.

Afterbanks provides the following services:

Account information Service or bank aggregation: An online Service to provide aggregated information about one or more bank accounts held by the user of Sage Bank Feeds, either with one or several payment service providers.

Financial information retrieval: Through the 'financial information retrieval' or account information service, Sage enables users to view their financial data, provided such information is available online via secure login details.

Security: Afterbanks warrants that the service will be delivered using security measures which ensure users' credentials are encrypted and are safeguarded against unauthorised use.

Encryption of login details: Afterbanks provides two types of encryption to provide appropriate Security:

- Symmetric encryption using the AES algorithm with a 16-character key (AES-128). This algorithm uses a single, shared secret key which allows data to be encrypted for storage and decrypted when needed for use.
- Assymmetric encryption using the SHA-256 algorithm. This algorithm is a cryptographic hash function that generates a unique signature from any input data. It is a one-way process, meaning the original data cannot be recovered from the hash.

Structured and standardised information: Afterbanks warrants that it will provide Sage with financial and non-financial information in a structured and standardised format. “Structured” means the information is in an electronic format, such as JSON or XML. “Standardised” means information from different Banks is presented in a uniform forma, compliant with applicable data standards.

Updates: Sage will refresh each user’s information up to four times per day, with the option for the user to trigger one additional update once every 24 hours.

Aggregated information: Afterbanks will store user credentials for the duration of the service. Afterbanks will not perform any cleansing of the aggregated information.
